The first part of the Events Calendar will be circulated in November / December 2008 and the second in May / June 2009.

We have modified the design so that you can run off individual pages for each month, as well as having a half-year-to-a-page sheet for your notice-board.

The idea behind this calendar is to provide health promoters with the necessary information to enable them to access resources direct from the main organisation.

If you come across any information within this calendar that is incorrect, we would be grateful if you would notify us.

This calendar is produced up to 9 months before many events take place. Whilst every care is taken to ensure the accuracy of the information it must be pointed out that, occasionally, the dates for events, websites addresses and telephone numbers may be changed by the lead organisations. We accept no responsibility for changes that occur after the production of the calendar. It is the responsibility of calendar users to check the details of events they wish to support..
